"We're all just in it for the love of it," Jason Bateman said to CBB. "It's not about making a billion dollars; we're just in it for the love of the film and the freedom of what it can be. That's why it's so different and why we're excited about it. It's a real ensemble, it's not a single character, it's an ensemble of characters and how they're all kind of coming together and where they come from." "There's something really special about it and we just want to be a part of it. We were fortunate enough to have Pixar on our side as we're trying to make our own way and do our own thing, so it's great to have it," Bateman added. Don't get your hopes up too much, though. In a recent interview, producer Clark Spencer said that "we're not going to make this film look like anything else out there." "We're going to make this a Zootopia film."1. Field of the Invention The present invention relates to a laser machining apparatus for performing laser machining of a workpiece by irradiating the workpiece with a laser beam, and particularly to a laser machining apparatus for controlling the divergence of a laser beam irradiating a workpiece. 2. Description of the Related Art Laser machining apparatuses for machining workpieces by irradiating the workpieces with laser beams are used in machining apparatuses for machining various workpieces. Laser machining apparatuses for machining workpieces are disclosed in, for example, Japanese Patent Application Laid-Open No. H6-240826 and Japanese Patent Application Laid-Open No. H10-113944. In laser machining, a laser beam generated from a laser oscillator is focused on a 2d92ce491b
