Realtek ALC662 Intel 82801GB ICH7 High Definition Audio Controller A1 PCI Added By Users

After latest updates, my sound card is not working. Foxconn G31MXP Motherboard. I am using Windows 7 Home Premium. Thanks. Intel 82801G (ICH7 Family) High Definition Aud io Controller (rev 01) 00:1c.0 PCI bridge: Intel Corporation . 5.1-channel audio subsystem using the Realtek* ALC662 high definition audio codec. 6. Support for Intel® High Definition Audio. 7. Support for 4-channel audio (two independent 2-channel audio streams). 8. The Intel® 82801G (ICH7 Family) High Definition Audio Controller and Realtek* ALC662 high definition audio codec are not supported in 8.1 for Windows 7. The driver and audio codec are supported in Windows 10. User comments. Hi, 1. After latest updates as I understood my sound card is not working too. Foxconn G31MXP Motherboard. 2. How do I enable 5.1 Sound? 25 May 2011 Hi, I've got problems with Realtek ALC662 Intel 82801GB ICH7 High Definition Audio Controller and Windows 7 Ultimate x64. There is no sound at all. I have read the Realtek's manual but didn't find anything useful. Please, help! Hi, I have installed Realtek's high definition audio controller on my PC with an integrated sound card (Intel 82801G). However, I cannot find the correct driver for my sound card on the Realtek website. Please help! I have just installed Windows 10 (64-bit version) and the audio driver is not there! Windows 8.1 supports Realtek ALC662 82801GB ICH7 High Definition Audio Controller (Cirrus Logic) Hi, I have a problem with sound. I installed Realtek audio codec driver and for some reason it didn't work so I did what the manual said and reinstalled the whole Windows audio driver. Now when I play a video through windows media player or audio recorder the sound is really distorted. It's just that when I record a voice or make any sort of sound, I can hear the sound through the headphones. Also when I turn on the microphone, it has no audio. What can I do? Please help I have a problem with sound. I installed Realtek audio codec driver and for some reason it didn't work so I did what the manual said and reinstalled
