In terms of the source files provided, Solo is also a very economical investment for soloists. Our instrument library includes a wide range of sounds for soloists as well as rhythm section players. We have the opportunity to create libraries tailored specifically to a certain musician's needs. This gives us the capability to create unique sounds that are not available in other libraries. Our catalog features a variety of musical instruments including pianos, guitars, steel pans, drums, electronic instruments, horns, and many more. Solo comes with a powerful host of plug-ins such as EQ, compressor, and reverb. Simply load it up in your DAW of choice and you will be able to create new custom sounds in a matter of minutes. Solo instruments are primarily constructed from acoustic, piano, synth, and electric sound sources. With the library we have at hand, you are free to take a journey through the musical worlds of our products. You will not find any gaps in the sound of the instruments. Each one of the instruments is meticulously constructed and placed to provide each sound its natural resonance, harmonic balance, and presence. This library is also suitable for instrument construction of completely new instruments. Solo comes with a powerful host of plug-ins such as EQ, compressor, and reverb.
