You don't have to tell me how important Jane Austen was to the foundation of romantic literature. Like *Romeo and Juliet*, *Pride and Prejudice*, and *The Moonstone*, she's an important figure in the literary world. (Even if Jane Austen wasn't actually around when all of this was happening, her work still had a great influence on it.) When it comes to writers who have lived a significant amount of their lives during the British Romantic Era, the list is even longer. Keats, Shelley, Byron, Dickens, and Hugo were all born in the late 18th century. In the 19th century, the Romantic Movement led to the creation of Jane Austen, Dickens, and Charles Darwin. And it's not even close. So it's no surprise that when the official Facebook account for The Royal Archives, the official account for The British Library, and the official Twitter account for the British Library all sent out a message on April 26th in which they stated that "Jane Austen was not the most common girl's name in 19th century England" and that "you've been trolled." A lot of people immediately started commenting on how ridiculous it is to claim that Jane Austen was not a common name for girls in 19th century Britain and accusing the British Library and the Royal Archives of trolling. That was kind of my point, actually. It's a very odd thing to make an argument based on facts. It's almost as if the writers of these two accounts had no idea what they were talking about. Yes, Jane Austen's name was not incredibly common in 18th and 19th century Britain
