References Category:Italian educators Category:Living people Category:Year of birth missing (living people)In a number of chronic conditions, such as hypertension, angina, coronary artery disease, and diabetes mellitus, a large number of patients suffer from elevated blood pressure (hypertension). Hypertension, which may be associated with "high blood pressure," is a serious condition affecting a substantial portion of the population and may lead to serious complications, such as heart attacks and strokes. Hypertension is a major risk factor for a variety of diseases, such as coronary artery disease and peripheral vascular disease. Hypertension is also associated with an increased risk of kidney disease, stroke, blindness, and other serious conditions. Hypertension is generally 2d92ce491b
