Estrogen inhibits gastric acid secretion via a presynaptic mechanism. This study was undertaken to determine whether estrogen modulates gastric acid secretion via a post- or presynaptic mechanism. Plasma levels of gastrin were measured in ovariectomized young and adult rats and in ovariectomized adult rats treated with estrogen or diethylstilbesterol (DES) for 2 weeks. Gastric acid secretion was measured by the radiolabeled histamine-N-tau-methylhistidine gastric emptying method. Plasma levels of gastrin were increased in young and adult animals treated with estrogen or DES. This finding was associated with a reduction in gastric acid output in response to

a pharmacological and physiological stimulus. The inhibitory effect of estrogen was blocked by the antiestrogen ICI 182,780. These findings demonstrate that estrogen inhibits gastric acid secretion via a presynaptic mechanism, and may contribute to the mechanism of action of estrogen in the prevention of peptic ulcer disease.

The countdown to Game 3 of the first round of the NBA Playoffs is now down to just 13 days. The Milwaukee Bucks are now breathing much easier than the Cleveland Cavaliers, as they hold the advantage in the series after Monday night's exhilarating Game 2. The only real problem the Bucks have with the Cavaliers is that they are the worst team in the NBA at home. On the other hand, they are the best team on the road. So the Bucks are looking for the Cavaliers to be

the worst team on the road. To make that happen, the Bucks need a few things to go right, and they certainly have some things to work on. For starters, they need to clean up the turnovers. Mike Dunleavy scored 12 points and dished out six assists, but was also responsible for seven turnovers. Khris Middleton added 14 points and five assists, but also had a turnover. Eric Bledsoe had an efficient game with 19 points, four rebounds and four assists, but also coughed it up five times. Giannis Antetokounmpo had 19 points, seven rebounds and three assists, but also had three turnovers. All of these things can change in a matter of seconds. The Bucks were able to control the game in the first half
