Man tailed home from Walmart on foot A 20-year-old man was arrested Thursday after being accused of kidnapping his girlfriend in a Walmart parking lot. According to Fayetteville police, officers responded to Walmart at 706 River Road around 3 p.m. Thursday in reference to a missing person. When police arrived, a woman

---

was seen trying to get into a car, and officers noticed the suspect was still in the parking lot, according to a statement. The suspect was identified as Michael Williams, who officers said was described as being 5 feet 8 inches tall and weighing about 110 pounds. Williams was taken into custody. The statement did not specify the reason for the woman's apparent disappearance. Williams is charged with abduction and is being held without bond. He is scheduled to appear at Cumberland County Superior Court on Nov. 28. [Effect of blood infusion of hemoglobin in rats on hemodynamics and metabolism in the liver]. The authors tested the influence of

---

allogenic hemoglobin on the hepatic microcirculation and hepatic metabolism of fructose, tyrosine and p-nitrophenol in rats. The results were the following: 1. Isolated hepatocytes stimulated with glucose and glucagon which are liberated by the reaction of fructose to glucose demonstrate significantly higher formation of D-glucose and D-fructose, that indicates an increase in the hexose shunt and D-glucose. 2. The permeability of the hepatocyte membrane is considerably increased by addition of hemoglobin. This was demonstrated by an increased fluorescence of the cells. The production of D-glucose is therefore decreased. 3. The level of p-

---

nitrophenol in the blood is sharply increased. This is caused by the activation of the microcirculation, in order to compensate for the reduced permeability of the membrane. 4. The metabolism of tyrosine is not changed. This can be seen from the measurements of the production of tyrosine from D-tyrosine, which is in fact markedly lowered by the addition of hemoglobin. It's only been a little over a year since we first saw what some of the most well-known video
