This video will show you how to use an universal code, at a very low price, to transfer money to another bank account. You may ask, "Why should I use this code?" Well, some banks offer a special money transfer rate, which is much better than the regular bank transfer rate. For example, Bank of America currently offers \$20 per GB. Transfer to your cash-back account and receive \$5. You can transfer a lot, even up to \$5,000 every month. You can even do a fixed amount transfer every month, and that's how this system works. You need to know how to fill up the form. You get \$5 for every \$100. You will need to transfer \$20. You'll get \$5. Now you can continue to make transfers every month. Send money to your card using your mobile phone, after receiving a text message with a unique code. Download the form from the internet, fill it up, print, and mail it to your bank. If you want to withdraw cash at an ATM, visit the nearest bank and withdraw cash. Upload your money by receiving money through your card. This money is in the form of bank account transfer. You'll also find a list of the bank that you can transfer the money to. You can transfer money through the Internet, the banking system, or by giving money to your friend. Make sure the code has been confirmed. If the transfer doesn't work, the problem might be that the code has been confirmed. Some banks want the money to be confirmed within a day, which means they will refuse to transfer money. Make sure you understand this policy before you send money. You can transfer money to more than one account at a time. You can
