With KEYMACRO, you can easily manage macros in your Word, Excel, PowerPoint and PDF files. In this way, you can save time and avoid a lot of tedious tasks whenever you need to use macros in one of those documents. What's more, you can give your macros a name, so that you can quickly find them, as well as apply specific actions to them. This means that you can also perform an easy Macros deletion if you no longer need a certain macro. Apart from that, you can set custom parameters for your macros, so that you can adjust their behavior to suit your preferences. You can also store your macros in a safe and convenient manner, so that you can use them in any Word, Excel, PowerPoint and PDF file without any worries. Extract PDF metadata KEYMACRO is a fully-featured PDF Extractor, and it provides you with a few ways to import and extract metadata from your PDF files. Thanks to the PDF Extractor you can extract metadata from a file, and then perform an easy content search on it. This can be easily done by pressing the "Search" button, selecting the file you want to inspect, and then clicking the "Extract Metadata" button. With this function, you can even extract all the metadata from multiple files, so that you can check out their properties together. Converts multiple PDFs to Word files Another useful feature you can take advantage of when using this PDF Extractor is the ability to create Word files from multiple PDFs, so that you can perform an easy export in this format. To do so, simply select the PDF files you want to convert and click the "Create Word Document" button. You can also choose the file type and the destination folder, and then go ahead and perform an easy PDF to Word conversion. You can also provide the app with a password to access your documents if you don't want to share them with anybody. Create a PDF from a Word file KEYMACRO can be used for both preserving your data and for performing an easy data backup. In this way, you can save a Word file, combine it with the original PDF and then turn it into a new PDF file. It can do this in a matter of seconds, without having to re-import the data. You can also set the parameters of your Word file so that you can adjust its content to suit your needs. What's more, you can also keep the PDF file you just created 1d6a3396d6
