This tutorial will show you how to create a vector dial for a monitor, smartphone, or watch that displays the current time or other time-related information. Unlike traditional graphic design, you will create this vector using the free version of Photoshop or the less-expensive Adobe Photoshop Elements. We'll make the dial 100% scalable, so no matter how big or small it is, the dial will still look great. You'll learn how to use the Direct Selection Tool (L) to manually draw and fill an angled hole, corner, and circle shape. We'll also make the dial look like a time watch dial that you see at the bottom of many smartphones and many watches and display it on a computer monitor, smartphone, or watch. Check out the pen tool and elliptical curve tools for further inspiration. Editing Vector Elements in Photoshop While you can't edit any vector element that we create in Photoshop Elements, you can delete any paths or shapes in the file or use object-based transforms like the grid or drop shadow to control the shape of elements. Download the Photoshopped dial vector file in the Resources section below. It contains a transparent background and a text logo, but you can remove the logo and adjust the shape of the dial by moving the shapes in the Layers panel. If you want to add your own text logo to the dial, you can do that by simply copying the dial element and pasting it into your own file. In Photoshop CS6 and earlier versions of Photoshop, we can create and edit vector elements using the pen tool, but today you will use the selection and direct selection tools. Before you use them, you will need to practice the direct selection and elliptical curve tools. Selecting and Filling a Polygon Shape First, we'll start by selecting a polygon shape. By clicking the direct selection tool (L) and clicking in an area of the image, we are selecting this exact rectangular shape of an area of the image. (L) Select the shape by clicking on the shape to draw the selection. (L) Click in one of the four corners or sides of the shape and drag out to select an arc. Keep your initial clicks tight together or you may need to click and hold in order to select an arc. (L) Press and hold Shift to select an even tighter, straight line shape. 05a79ceeff

[Cardiotoxicity of the antitumor agents dacarbazine and cyclophosphamide]. The antitumor agents nitrogen mustards (DAC) and cyclophosphamide (CYCLO) are two of the most widely used drugs for treating cancer. Treatment with nitrogen mustards is well known for its cardiotoxicity, which is manifested as cardiac necrosis or cardiomyopathy. CYCLO is known to produce minimal cardiotoxic effects. We report the results of an animal study undertaken to assess the cardiotoxic effects of DAC in rats. In a double-blind, randomised, experimental, prospective, controlled trial, 15 Wistar rats were treated with DAC (100 mg/kg/day, by ip injection) for 15 days, and 15 controls received the vehicle (saline solution). Serial echocardiographic and electrocardiographic evaluations were performed before, at the end, and 30 days after the start of treatment. Cardiac histopathology was obtained on the 15th day of treatment. Echocardiographic evaluation showed a decrease of left ventricular systolic volume ($p=0.001$), ejection fraction ($p=0.011$), fraction shortening ($p=0.002$), and fractional shortening ($p=0.002$). Echocardiographic evaluation showed a decrease of left ventricular systolic volume ($p=0.005$), ejection fraction ($p=0.002$), fraction shortening ($p=0.006$), and fractional shortening ($p=0.001$). The electrocardiographic evaluation showed a decrease of QTc with DC of the low rate (pA customer service representative has an opportunity to make a difference! Does she want to do so? Q: (Laravel 5.4) How to use cache for page render time? I want to use cache for page render time. But Laravel 5.4 cache for page render time not working. I googled for the solution but failed. My config: return ['cache' => 'default', 'keyPrefix' => env('CACHE_PREFIX', null), 'modeCache' => 'default', 'cacheTime' => 1800, 'cacheTags' => ['dev' => ['driver' => 'default', 'prefix' => '', 'prefixClearRegexp' => false,],], 'backupGlobals' => false, 'backups' => ['error' => 'default',], 'prefix' => '']; I want use cache in my first page. A: You can use code like: if(Cache::has('name_of_file')) return Cache::get('name_of_file'); return Response::make(\$file, 200); A: It's not a good practice to use cache for page render time because PHP will detect that in the page render time and will not create cache. The best way is to use it in a section of the application instead of whole application. Entries in disney park (2) The Disney Parks Blog over the last few months have been talking about a number of reasons that make Disney's Burbank location a great spot to stop by on any Disney vacation. And they all are true. I love the Disney Parks Blog because they have a way of explaining any Disney concept in a way that is easy to understand. And as they say, nothing beats the real thing. So I figured, why not take a ride

System Requirements:

Minimum: OS: Windows Vista or higher Processor: Intel Core 2 Duo E4500 or AMD Phenom II X4 940, 2.53 GHz RAM: 2 GB RAM Hard Drive: 4 GB Graphics: Intel HD Graphics 3000 or AMD Radeon HD 4350 or better, DirectX 10-compatible Internet: Broadband Internet connection Recommended: OS: Windows 7 or higher Processor: Intel Core i5-4590 or AMD FX-8350, 2.9 GHz RAM
