“Saving the award for last, I am incredibly pleased to announce this new ‘HyperMotion Technology’ will be introduced to FIFA on PS4, Xbox One and PC. “Properly implemented into the game, we believe this will deliver another step towards making this the greatest football game of all time. “It has become very clear over the years that football fans around the world take their lead from our game. I am personally dedicated to delivering this ultimate football experience for our fans and, with this new technology, I believe we are getting ever closer. “Our skills lab is using real-life data to capture and identify the subtle and detailed movements of a real-life player. It will then be used as the base for the AI and physics of this game. “Starting this project 18 months ago, our aim has been to make this the best football game of all time. “We have gone back to the world’s leading experts in physics and movement to ensure we deliver our fans a complete football experience.” – Philippe Bowen, Executive Producer “In the worlds of games, movies and music, a movie or song which everyone loves, they call it ‘a classic.’ “For our game FIFA, we wanted to make a ‘classic’ as well, so we started the project ‘a classic.’ We have been collecting data and have begun to make the final adjustments for our global debut. “We started by matching our best players from past FIFA games and checking with them to understand their actions. “This took us to the level of the best players in the world, ones that haven’t been in a FIFA game for a few years. We have a set of players that play consistently in the World Cup qualifiers, the Under 20 World Cup and the Confederations Cup, but have not made their FIFA debut. “We recently gave the players the data we have collected and were able to recreate what they do without losing any of the actual action. I was astonished at the results. “A team of industry experts went through all the data and, after looking at the results, we realized they were on point in every aspect, from the action on the pitch to the

For the FIFA faithful, Ultimate Team is back and bigger than ever. Spend in-game currency to build a dream squad of footballers, with an endless amount of ways to customize and enhance each player. At its core, FIFA Ultimate Team gives you new and exciting ways to play the game, with random drop-in, drop-out matches, a revamped Global Transfer Market (GTM), and new player progression. **PLAY STYLE Skill Moves** - Get a boost of speed, control and movement using the FIFA Skill Series, which includes Rush, Counter, Sprint, Jumper, and Dynamic Dribbling. Make the most of every moment by putting your moves to the test, with the new Rush and Counter button available in Career Mode and FIFA Ultimate Team. **Goalkeeper Roles** - From the goalkeeper that never gives up to the goalkeeper that never fails, every goalkeeper now has their own distinct personality. Four goalkeeper roles are now available for free, with more roles to be unlocked as players progress through the game. **Quick Rush** - An entirely new skill for the goalkeeper in FIFA 22 allows players to take advantage of the unpredictability of matches and score amazing goals. Quick Rush gives players an extra burst of speed in the goal kick, which can be used for both saving and scoring. Using Quick Rush in attacking position creates a lightning-quick goal-scoring opportunity. **Quick Control** - When attempting a long pass, players can apply control to their ball using the new Quick Control system. Quick Control provides a new way to interact with the ball and makes it easier to control the short or long pass, while still offering new challenges for players. **New Interactions** - FIFA 22 introduces a number of new interaction systems, including the Brand New Crucial Interactions. Brand New Crucial Interactions allows players to change direction, challenge for the ball, and regain possession. In addition, physical interactions with the ball are more responsive, with a greater ability to direct and control the ball. **Popping and Squeezing** - Two new momentum-based controls, Popping and Squeezing, are now available. Players can choose to play how they want, letting the ball do the work or taking total control of the action. As players rely more on these controls, they will feel more connected and comfortable with the ball and each other. **New Defensive Interactions** - When players are aggressively pursuing possession, they can now intervene by both pushing back to and quickly trying to turn the opponent away. These Interventions can
