Picture Viewer Portable is a lightweight software application designed for helping you preview images with the aid of a straightforward feature package. Keep it on portable devices This is the portable version of Picture Viewer which makes it an ideal candidate for being saved on USB flash drives. You can gain access to the tool's features by simply running the executable file (there's no installation included in the process). A quick deletion task is sufficient for getting rid of the utility because it does not store entries in your Windows registry. Simplistic looks You are welcomed by a clean and minimalist working environment that comes packed with only a few configuration settings. Decoding the dedicated parameters won't take much of your time because they look highly intuitive. Picture viewing options Picture Viewer Portable gives you the possibility to import images in working environment using the built-in browse button (the drag-and-drop support is not implemented). The application offers support for basic photo viewing capabilities. You are only allowed to import and preview the content of the image. Professional users may be disappointed by the poor support for advanced features. You cannot zoom in or out of photos, make file associations, apply special effects, make use of preset hotkeys for jumping to the next/previous file from a custom folder, turn on a full screen mode, generate slideshows, preview pictures with the aid of thumbnails, flip and rotate images to different angles, and convert photos to different file formats, just to highlight some options. Tests have shown that Picture Viewer Portable loads images quickly but does not offer very good output results because the photos are displayed in a small panel. It is not a resource hog so you do not have to worry that it eats up CPU and memory resources. Key features: * Drag-and-drop support * Import images from your computer * Preset hotkeys to access the tool * File associations for different file formats supported: PPS, MOV, JPEG, PDF, JPG, SVG, PNG, BMP * Simple and easy-to-navigate interfaceQ: Using input values in a method. Passed as arguments to a method I'm trying to write some code in VBA to automate a spot in Excel where the input value is checked against a website. However, I'm having a bit of a problem. I would simply like it to return the text 'not found' if the input value is incorrect, and to return the text b7e8fdf5c8
